Munis® Field Inspector
For Microsoft® Windows® 8 and Windows Phone 7.5
The Smart Solution

It's no secret - being a Building Inspector can be challenging. You're probably juggling busy schedules, likely keeping track of cumbersome papers or static data on a laptop, and possibly driving back and forth to the office to manually re-enter your information.

You don't have to.

Tyler's **Munis Field Inspector** solution, designed for Microsoft Windows 8 and Windows Phone 7.5, lets you do your job right from your Windows phone or tablet. Simply connect to a cellular or Wi-Fi signal, and instantly access the day's schedule and other necessary information—capture comments and attach photos from the field—and upload your results directly to your Munis Enterprise Resource Planning (ERP) system. And it's all done all right from the palm of your hand.
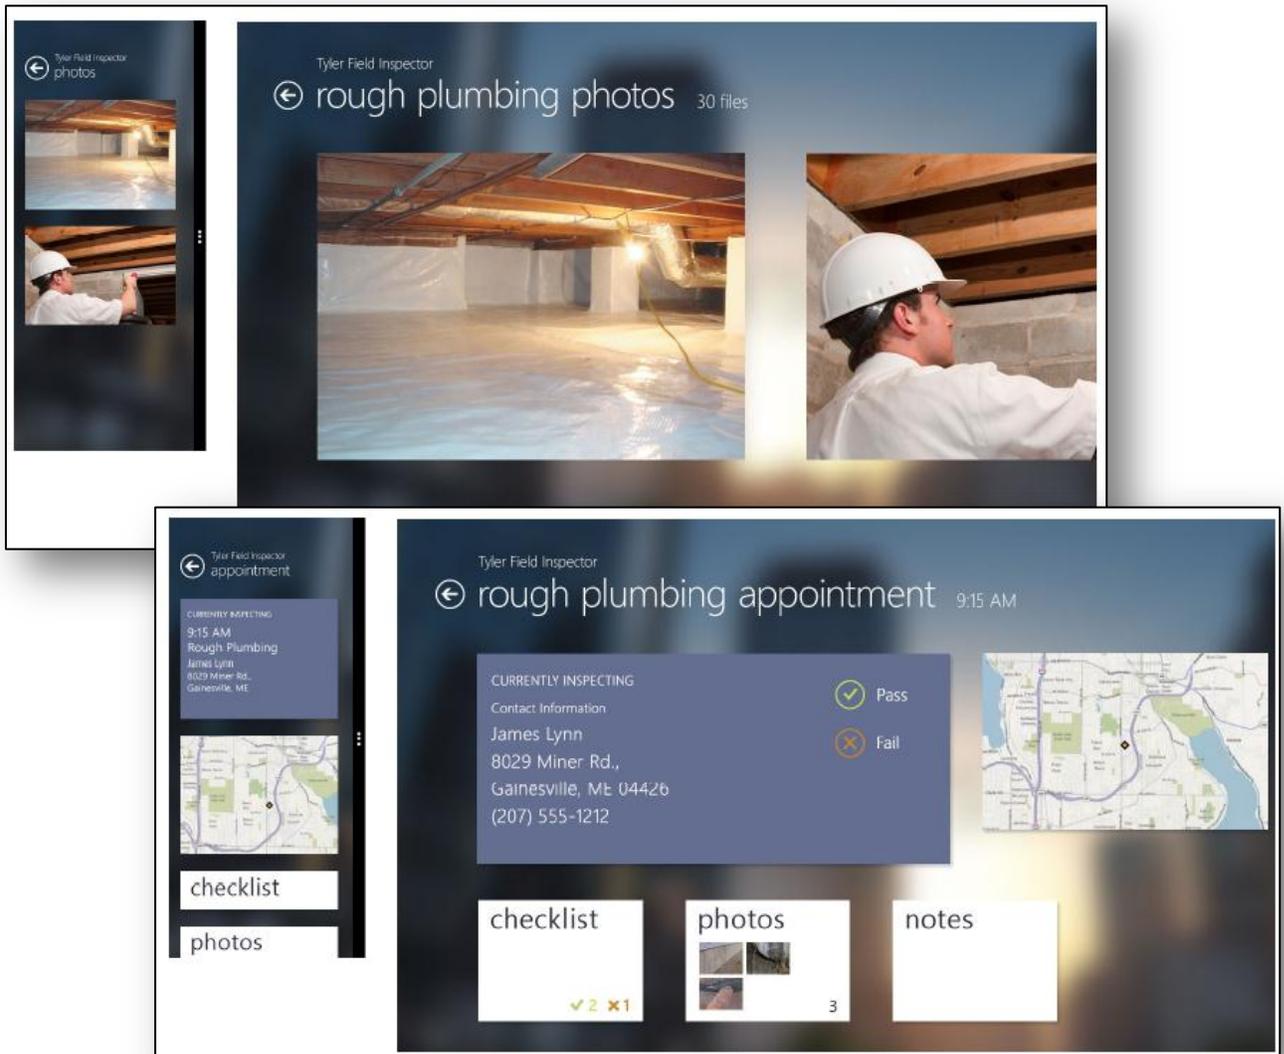

What's more, leveraging versatile Windows 8 features lets you:

- Search, share and snap **pictures** or other information;
- Review your upcoming **appointments** with Semantic Zoom;
- Access and create **notifications**;
- View your **data** with Live Tiles, essentially allowing you to customize your screen with your favorite or most important information;
- And more.

Find yourself without Wi-Fi or cell service? No problem. Simply enter your data – whether you're in a basement, cramped crawlspace or any area with little or no connection – and your device will cache your inspection results. Once you're within signal range, your data automatically uploads to Munis.

Empowering people who serve the public™

tyler technologies

In short, **Field Inspector for Microsoft® Windows® 8 and Windows Phone 7.5** keeps you **efficient** (seamless flow of information between your office and the field); **organized** (no more cumbersome papers to carry around); **versatile** (in-hand data entry, eliminating clipboard-and-paper or static laptop entry); and **cost effective** (inspections take less time, require less paperwork, eliminate duplicate data entry, and effectively increase productivity).

Let Tyler help you take your inspections to the next level. **It's the smart solution**.

Requirements:
Software: Munis Permits & Code Enforcement, Munis Central Property File
Hardware: Windows smartphone with data plan for phone use; Windows tablet for tablet use with Internet connection
